

ON THE ROAD AGAIN

RGHP02

- High-performance qualities.
- Sporty handling and short braking distances.
- Sharper steering precision.
- Optimal aquaplaning protection.

17" to 20"

RGS02

- Reliable handling
- Shorter braking distances on dry and wet roads
- Optimal aquaplaning protection
- Reduced rolling noise

14" to 16"

RGAS02

- Rubber compound ensures good grip in all weather conditions.
- Tread construction ensures low rolling noise.
- Short braking distance on any road surface.
- Efficient water and snow dispersion enhances control and steering precision.

14" to 19"

WINTER+

- Optimised grip on snow and wet road surfaces
- Optimal driving and braking characteristics under 7°
- Accurate steering precision on wet roads
- Optimal protection against aquaplaning

14" to 17"

RGVAN01

- Extra reinforced tyre structure
- Robust profile with continuous tread grooves
- Optimum protection against aquaplaning
- Stable when braking and in the event of lateral loads

14" to 16"

RGASV02

- High load capacity and excellent performance.
- Tread structure increases grip on wet, snow and ice.
- Tread ensures shorter braking distances and more grip.
- Less rolling resistance: excellent mileage.

15" to 17"

ROADHOG TYRES SPECIFICATIONS

- Comprehensive Size Range available on passenger car tyres, SUV/4x4 and commercial van tyres.
- Reliable and predictable driving behavior.
- Special rubber compound and thread construction.
- Optimized performance during extreme weather conditions.
- Excellent handling.
- Affordable outstanding quality on any level.
- A Sentury-Group product.
